RE: Annual Backflow Prevention Assembly Testing Required at:
[REDACTED], OAKVILLE

Halton Region's Drinking Water System By-Law No. 71-19 (By-Law 71-19) puts mechanisms in place to prohibit the discharge of substances into the drinking water system. This includes requiring the annual testing of Backflow Prevention Devices. These devices prevent water from flowing in the opposite direction or "Backflow" from private plumbing systems into the municipal water supply.

As per By-Law 71-19, the following backflow prevention device requires testing:

Serial #: [REDACTED] Test Due By [REDACTED]

It is mandatory that an Authorized Tester perform the testing and any maintenance and repairs of the Backflow Prevention Device.

A list of independent Authorized Testers is located at www.halton.ca for your convenience. Halton Region suggests that you obtain several quotes before selecting a tester and the Region does not endorse or provide a warranty of the services, prices, or qualifications of the testers listed at www.halton.ca.

If you already made arrangements for testing, please submit the completed original test report and test fee (\$58.37 + HST) payable to Halton Region to: Cross-Connection Control Program
1151 Bronte Road, Oakville, Ontario L6M 3L1

Failure to complete the testing requirements is an offence that could result in the Region exercising its remedies in accordance with the Offences, Enforcement and Penalties section of By-Law 71-19 which includes charges or the issuance of an Order.

Halton Region would like to thank you in advance for your efforts in helping us keep the water system safe. If you require more information please visit our website at www.halton.ca, or contact us by phone at 311, or toll free 1-866-442-5866 (1-866-4HALTON), or by emailing backflow@halton.ca.

Sincerely,

Aneta King, Cross-Connection Control Coordinator

Regional Municipality of Halton
